

ULTRON TECHNIQUES

YOUR PARTNER IN
SMART SOLUTIONS

ULTRON VMS

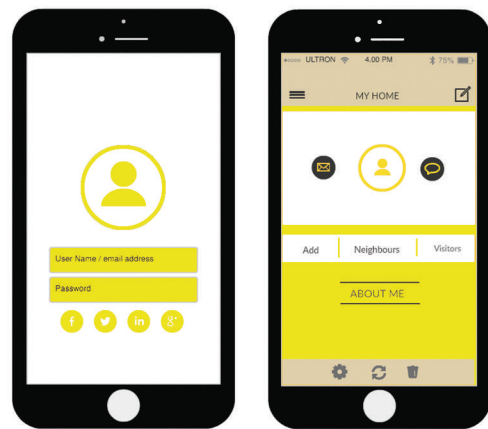

An innovative tablet-based visitor management software that provides an unmanned reception solution for residential estates and commercial buildings. It enables a quick and effective registration process through digitalising and automating the routine administrative challenges of visitor identification, user authentication and visitor monitoring.

VISITOR MANAGEMENT SYSTEM

DYNAMIC SYSTEM,
EFFECTIVE SECURITY

Example of the app for residential estates

Productivity

Management will be able to save time in managing paperwork, controls and internal security as data is tracked and recorded automatically in encrypted databases.

Enhanced Visitor Experience

Visitors would be able to register their visits effortlessly with the automation of the routine processes. Manpower can be redeployed to concentrate on other duties assigned.

Reliability

A fully-digitized encrypted system that is working 24/7, capturing visitor's confidential information seamlessly. Strong backend support via cloud allows for immediate operational continuity.
